**Category:** Products > NMR Spectroscopy - Consumables and Accessories > Consumables for Liquid-Phase Small Volume and External Reference NMR Studies

### Stem Coaxial Inserts

- The most versatile and reliable coaxial system available for various NMR experiments.
- General applications include small volume NMR, external referencing or locking and magnetic susceptibility determination.
- Ideal for variable temperature studies, all parts are made from Pyrex® glass.

**Note:** Outer tube must be ordered separately based on magnetic field strength.

Product Number	For Outer Tube OD (mm)	Stem Height (mm)	Stem OD (mm)	Reference Capacity	Sample Capacity	Use Insert with Tube No's	Price
WGS-4BL	4	25	2	30 µL	124 µL	406-PP-7, 427-PP-7	\$27.86 (P)
WGS-5BL	5	50	2	60 µL	530 µL	506-PP-7 to 535-PP-7	\$30.75 (P)
WGS-8BL	8	50	3	190 µL	1560 µL	513A-XPP-7 (X=1,3,5,7)	\$50.11 (P)
WGS-10BL	10	50	4	410 µL	2600 µL	513-XPP-7(X=1,3,5,7)	\$55.72 (P)

The upper section of each insert fits snugly into the outer tube, much like a syringe plunger fits in its barrel. The stem is held straight within 0.013mm. Order the outer tube separately.

**NOTE: #521- caps are 100 or 1000 pk). Cap with hole #521-99010153-100 (100 pk).**
